

## CHANNEL 19

In order to reduce congestion on VHF working channels, Marine Rescue NSW have allocated different working channels for adjacent radio bases. **Marine Rescue Lake Macquarie's** radio base at Swansea Heads is now using **VHF Channel 19** as its main working channel. Some VHF sets can be switched between International and USA. Vessel owners need to ensure their radio is set to **"International"**, not **"USA"**, in order to satisfactorily converse with our radio base on Ch. 19, see the link below

[Use the right radio setting](#)
